

## Choose from 3 cooler options

3300

Borg Cooler

Acis 500

the  
**refreshing**  
choice

Choosing a bottle-less  
solution doesn't mean a  
watered down service

## Why choose us?

### **NEW "SIP technology"**

This NEW innovative technology automatically sanitises your coolers internal waterways 365 days per year.

### **Money back 48hr Call Out Guarantee**

In the unlikely event of a breakdown, should we fail to resolve the fault within 48 hours RefreshingChoice will refund the entire month's rental cost relating to the cooler in question.

### **NEW "Cooler-network technology"**

We pride ourselves at RefreshingChoice in being more flexible to our customers needs, well now, so are our Water Coolers! RefreshingChoice are the first Mains Fed Water Cooler Provider to develop and offer our customers a new service called "Cooler-network Technology". This new service, allows you to simply unplug your new Refreshing Water cooler from one point and move it to another in the same room or anywhere else within your building, where you can then, simply plug the Water Cable into another "Cooler-network connection socket", in exactly the same way you would with your Telephone or PC Networks, making our system as flexible as the old cumbersome "Bottled" coolers.

### **We'll take care of your existing agreement**

RefreshingChoice will even settle any financial notice obligations you may have with your existing "Bottled" supplier, so you can enjoy your new Refreshing Service straight away without costing you a drop!

# A quality service

Refreshing Choice have created 3 quality service levels for you to choose from, enabling you to select the level of service that suits both your budget as well as the quality service standards you should be demanding from your Water Cooler Service Provider.
